## Clip-On Microphone

Whether used in musicals, live shows, broadcasts or presentations, the MKE 1, Sennheiser's smallest clip-on microphone, delivers its best performance exactly where a microphone needs to be invisible – and still offers great sound without any trade-offs.

Shielded from sweat by a new protective membrane, the MKE 1 lasts longer than other clip-on microphones, especially under the tough conditions of live performance. Its special gauze and an additional protective cap protect it from most moisture and mean that it only records what it's supposed to: perfect sound.

The MKE 1 builds on this feature with its robustness: its cable with low impact noise and integrated anti-kink protection makes it a microphone on which you can fully rely.

### FEATURES

- Great strengths - small microphone
- Very small dimensions (3.3 mm capsule diameter)
