

HIGHLIGHTS

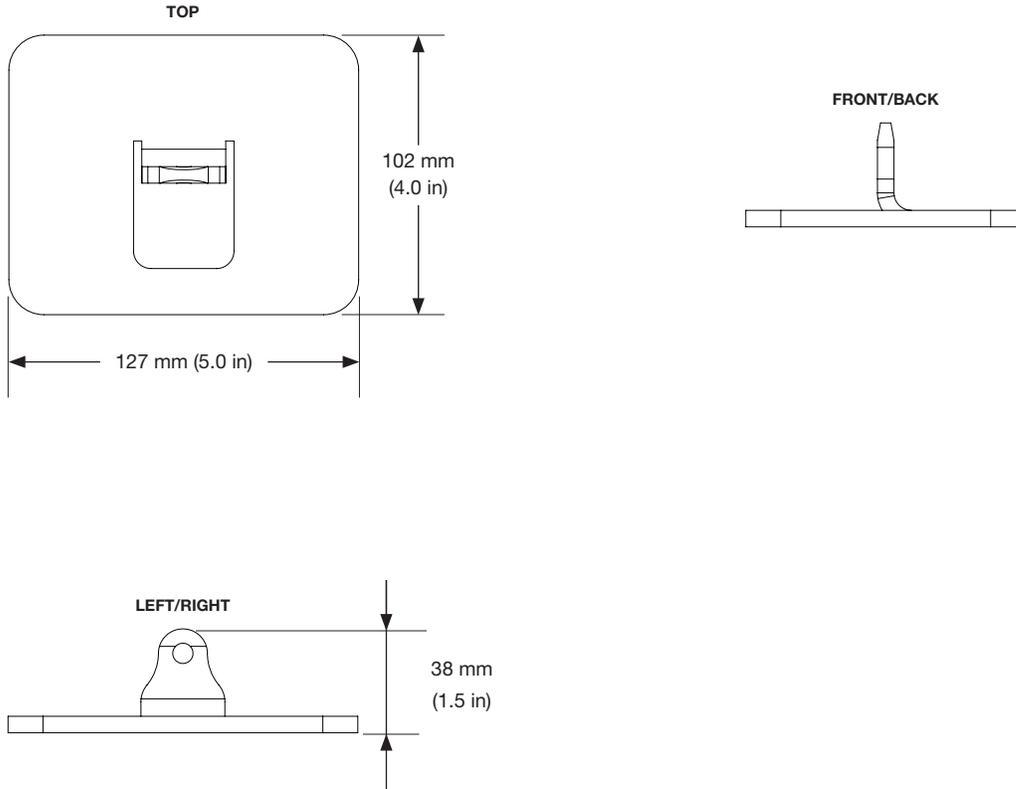

- Ground stack accessory for VTX subwoofers
- Improves stability
- Attaches directly to the integral rigging
- Compatible with VTX B15 and VTX B18

DESCRIPTION

The VTX B1 GND is a universal outrigger accessory used to improve stability in ground stack configurations built on supported VTX subwoofers. The GND connects directly to the subwoofer’s integral rigging hardware and enlarges the base footprint of the stack. The accessory can be used with subwoofer-only ground stacks of more than four enclosures or when full-range VTX speakers are stacked on top using one of the supported base plate accessories. The four-part design is compact, lightweight, and easily fits into standard road cases. Ground stack parameters and mechanical safety of arrays are calculated using JBL’s LAC-3 software. For more information about the VTX B1 GND and use cases refer to the product Rigging Manuals.

DIMENSIONS

TECHNICAL SPECIFICATIONS

PHYSICAL

Construction : High-grade steel with anti-corrosion coating

Finish : Black powder coat

Dimensions (H x W x D)¹ : 38 mm x 102 mm x 127 mm
(1.5 in x 4.0 in x 5.0 in)

Net Weight : 0.5 kg (1.2 lbs) each | 2.0 kg (4.8 lbs) total
Shipping Weight : 2.9 kg (6.5 lbs)

ORDERING INFORMATION

SKU : JBL-P3258MX | VTX B1 GND

Included : (4) Ground stack plates

Footnotes:

1: Refer to the 2D and 3D Customer Drawings for more detailed dimensions.

JBL continually engages in research related to product improvement. Some materials, production methods and design refinements are introduced into existing products without notice as a routine expression of that philosophy. For this reason, any current JBL product may differ in some respect from its published description, but will always equal or exceed the original design specifications unless otherwise stated.
